

OUR FAVOURITE SCIENCE SHOWOFF IS IN TOWN!

Can you really launch marshmallows out of a vacuum cleaner, make rockets from common household items, or discover how the SKA telescope works using a leaf blower cannon?

Prepare yourself for some serious mind-boggling science as Dr Graham Walker reacts, explodes and experiments his way through the physics of pressure and motion, the chemistry of things that go boom, and much more. With lots of audience involvement, laughs, learning and exciting experiments, this action-packed show is a celebration of the fun in science!

**19 - 21
MARCH
2014**

WHO IS DR GRAHAM WALKER?

Dr Graham Walker has been performing science shows for the past 13 years and is one of only two people in the world with a PhD in science show performance. His unique brand of high-energy delivery and amazing science regularly thrills audiences around the world.

Direct from the Australian National University to Africa, don't miss this rare opportunity to see him in action. Presented with the support of the Australian High Commission, South Africa.
